## about me

I'm a web developer with 5 years of experience. I use modern web frameworks and CSS to create interfaces that look great and are easy to use. I like being an engaged team member and coming up with improvements and new features together.

So far I've been working on projects that solve a problem that real humans have, and I'm looking for opportunities that allow me to keep this going, as it's what I enjoy the most.

I value workspaces that are tech-driven, inclusive and open to the ideas of the people in them.

## work experience

10/2023 — today

### Afilio

- Developing an accessible web app using Vue and Firebase, that helps lift the burden of bureaucracy
- Writing simple and resilient TypeScript code
- Making our frontend more modular
- Finding ways together to let users create secure legal documents more easily

09/2021 — 08/2023

### Omio

- Worked on premium features and price insights to travellers, like travel insurance offers, cancel-for-any-reason and showing dates with cheapest prices
- Coded in and reviewed React and React Native
- Maintained and iteratively improved cross-platform component library
- Advocated for and worked on accessible UX
- Developed internal tools for DX and productivity

08/2020 — 08/2021

### Adevinta Hungary

- Worked in a cross-functional team on Hungary's #1 classified ads site
- Engaged in identifying and creating simple solutions to improve UX together
- Helped simplify search experience
- Maintained legacy AngularJS codebase while adding new features in React
- Took part in full React-SSR TypeScript rewrite
- Set up A/B tests and marketing campaigns

02/2019 - 08/2020

### Freelance Web Developer

- Designed and implemented responsive web apps to fit client needs using MERN stack and Firebase
- Created customized web dashboards for small companies to monitor their workflow and manage their data

## workflow

### languages

javascript  
typescript  
css, sass
