## about me

I'm a frontend developer with 4 years of experience. I use modern web frameworks and CSS to create interfaces that look great and are easy to use. I like being an engaged team member and coming up with improvements and new features together.

So far I've been working on projects that solve a problem that real humans have, and I'm looking for an opportunity that allows me to keep this going, as it's what I enjoy the most.

I value workspaces that are tech-driven, inclusive and open to the ideas of the people in them.

## work experience

09/2021 — today

### Omio

- Working on premium features and price insights to travellers, like travel insurance offers, cancel-for-any-reason and showing dates with cheapest prices
- Writing and reviewing React and React Native code
- Maintaining and iteratively improving cross-platform frontend component library
- Writing unit and end-to-end tests
- Advocating for and working on accessible UX
- Developing internal tools for developer experience and productivity

08/2020 — 08/2021

### Adevinta Hungary

- Worked in a cross-functional team on Hungary's #1 classified ads site
- Engaged in identifying and creating simple solutions to improve UX together
- Worked on simplifying search experience: search filters, search results ordering and transparency, save search feature
- Maintained legacy AngularJS codebase while adding new features in React
- Took part in full React-SSR TypeScript rewrite with Lerna, Tailwind, Rollup and Storybook
- Set up A/B tests and marketing campaigns

02/2019 - 08/2020

### Freelance Web Developer

- Designed and implemented responsive web apps to fit client needs using MERN stack
- Created customized web dashboards for small companies to monitor their workflow and manage their data
- Helped clients deploy projects to Node+Express servers, set up databases or serverless solutions with Firebase

## workflow

### languages

javascript  
typescript  
css, sass

### frameworks

react  
react native  
vue  
tailwind  
redux

### tools

jest  
cypress  
puppeteer  
storybook  
figma  
git
